Anthony Murphy
UX / UI Engineer

anthonymurphy.dev@gmail.com
 Delray Beach, Florida

> As a recent graduate of Boca Code's software engineering course, I'm feeling excited to connect with others in the UX UI engineering world and make a real difference through my work. I've got a lot of fresh ideas and a ton of enthusiasm for the field, and I'm looking forward to collaborating with like-minded folks who share my passion. <

Experience

Boca Code | 2023 UX / UI Designer Intern

Designing a new interface and experience for the Boca Code website.

- Manage and coordinate 2 projects with the UX/UI - Engineering team, including the redesign of the candidates page for Boca Code's mobile version and a CRM for a company connecting investors with startups.
- Facilitating team meetings, utilizing Kanban board, and implementing Jira board as an agile project management tool to streamline tasks and improve efficiency.
- Implemented a sprint-based approach, resulting in a significant increase in on-time delivery compared to previous projects.
- Completed my first sprint with a great team of interns resulting in adding an upgrade tier feature and a profile page to update email and password to be able to see basic information on a user's account.
